DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: There are no heading, for example: "Summary of The Invention", Brief Description of The Drawing" etc.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.
3. Claims 1-20 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. The term "sufficient", line 8, in claim 1 is a relative term, which renders the claim indefinite. The term "sufficient" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Without some indication of the amount of air contemplated, undue experiment would be required to prepare a package as claimed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3721

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-20 and 22, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Osgood (5134001) in view of Lerner et al. (4201029).

Osgood discloses a method of packaging comprising the steps of forming a tube (see fig. 1), forming seal at top and bottom (18, 24, fig. 1), feeding pre-determined amount of food (22, fig. 1) and forming a strip of sealed pouches (see figs. 5, 6).

Osgood, as mentioned above, disclosed⁴² all the claimed limitations except for inserting the strip of pouches into a carton.

However, Lerner et al. teach to insert strip of pouches into a carton (see fig. 1) to permit large number of bags into the carton (see col. 3, lines 7-10). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to having inserted strip of pouches as taught by Lerner et al. in the method of Osgood for packaging to permit large number of bags into the carton.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
